

Starting and Stopping Asterisk

From "AllStarLink Wiki"

There a couple of ways to start, stop, or restart asterisk.

Stopping Asterisk:

```
astdn.sh  
;or  
service asterisk stop
```

Starting Asterisk:

```
astup.sh  
;or  
service asterisk start
```

Restarting Asterisk:

```
astres.sh  
;or  
service asterisk restart
```

Status of Asterisk:

```
service asterisk status
```

Asterisk is automatically started when the system completes the booting process
